Propeller Hooded Roof Fans Series A - Model AE and AS

Exhaust and Supply Fans

Ω Þ m z _ B

April 2016

Model AE and AS Propeller Fans

AE and AS propeller fans are specifically designed as an economical approach to the exhaust or supply of clean air applications.

Utilizing a die formed aluminum blade with a steeply pitched orientation, our robust design of the AE and AS fans maximizes performance and operating efficiency while maintaining low sound levels.

Typical Installations

- Education Facilities
- Office Buildings
- Manufacturing
- Hospitals
- Apartment Complexes
- Airports

Benefits

- Quieter compared to traditional propeller fans.
- Less expensive than centrifugal fans.
- · Easy to install and maintain.

Greenheck's models AE (axial exhaust) and AS (axial supply) spun aluminum direct drive fans are designed for economy and reliability in low pressure/low volume applications. Typical applications include general clean air ventilation.

- Performance capabilities up to 6,000 cfm (10,200 m³/hr) and up to 1.0 in. wg (250 Pa) of static pressure.
- Seven fan sizes are available from 10 to 24 in. (254 to 610 mm) propeller diameter.
- UL Listed for electrical.

- Performance as cataloged is assured. All fan sizes are tested in an AMCA Accredited Laboratory and all models are licensed to bear the AMCA Sound and Air Performance seals.
- Greenheck subjects these products to extensive life testing, assuring you the fans will provide years of reliable performance.

Greenheck Fan Corporation certifies that the models AE and AS fans shown herein are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program. The certified ratings for Models AS and AE are shown on pages 6 thru 9.

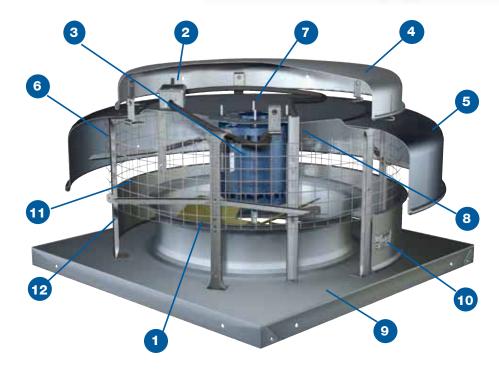

Models AE and AS are listed for electrical (UL/cUL 705) File no. E40001

Features

Standard Construction Features

1. Propeller

Fabricated aluminum propeller with steeply pitched blades designed for low rpm, which generates low sound levels. Each propeller is statically and dynamically balanced for long life and quiet operation.

2. Switch

NEMA-1 switch is included and wiring is provided from the motor as standard (other switches are available). All wiring and electrical components comply with the National Electrical Code (NEC) and are either UL Listed or Recognized.

3. Motor

Carefully matched to the fan load and is mounted in the airstream. All motors are compatible with speed controller except "A" speed motors on the size 20.

4. Motor Cover

Constructed of aluminum and attached with stainless steel hardware for easy removal and access to motor.

5. Fan Shroud

One-piece, heavy-gauge aluminum with a rolled bead for extra strength.

6. Shroud Braces

Adds structural integrity to the shroud.

7. Vibration Isolation

Vibration isolators support the motor and propeller for long life and quiet operation.

8. Internal Conduit Chase

A large diameter conduit for installing electrical wiring through the curb cap into the motor compartment.

9. Curb Cap

Curb cap and integral deep spun venturi inlet are constructed of aluminum to prevent corrosion. Curb cap has 5/16 in. (8 mm) prepunched mounting holes to ensure correct attachment to the roof.

10. Nameplate

Permanent stamped aluminum plate for exact model and serial number identification.

11. Galvanized Birdscreen

1/2 inch square galvanized rigid wire mesh protects the fan's discharge from birds or small objects.

12. Lower Windband

Heavy-gauge aluminum with formed edges for added strength and weather resistance.

Options and Accessories

Roof Curbs

Prefabricated roof curbs reduce installation time and costs by ensuring compatibility between the fan, the curb and roof opening.

A wide variety of roof curbs are available, including flanged and pitched.

Curb Extensions

Extensions raise the fan discharge above the roof line or provide an accessible mounting location for dampers.

Aluminum Birdscreen

1/2 inch square aluminum wire mesh protects the fan's discharge from birds or small objects.

Speed Controllers

Available for providing an economical means of system balancing with direct drive fans.

Dampers

Designed to prevent outside air from entering back into the building when fan is off. Includes gravity and motorized dampers.

Coatings

Wide variety of coatings and colors are available.

Greenheck coatings and resistance charts can be found in Greenheck's Product Application Guide for Performance Coatings for Ventilation Products.

Disconnect Switches

A wide selection of NEMA rated switches are available for positive electrical shutoff and safety including: dust-tight, rainproof and corrosion-resistant. Switches may be internally or externally mounted.

Typical Installation

Model AE and AS fans are designed to meet the needs of general clean air applications. Tests were conducted to assure safe, rugged and reliable operation.

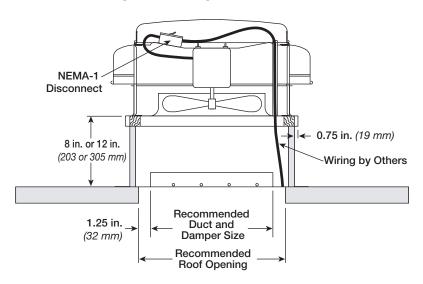

Due to the varying airstreams encountered in commercial ventilation, system designers must be aware of national, state and local codes and guidelines governing these installations. Local code authorities should be consulted before proceeding with any ventilation project.

Internal conduit chase provides means for electrical service connection through fan housing.

When roofing materials extend to the top of the curb, roof curbs should be 1½ inches (3/4 inch on a side) less than the unit curb cap to allow for roofing and flashing.

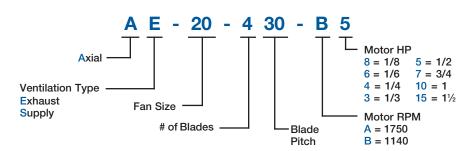

For recommended damper size and roof opening dimensions, refer to the dimensional data on pages six and eight.

Installation must include a means for inspecting, cleaning and servicing the fan.

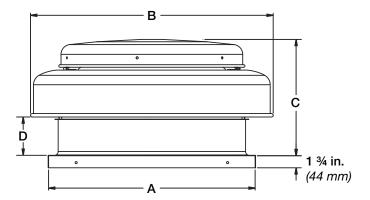

Model Number Code

The model number system is designed to completely identify the fan. The model number is determined by the ventilation type, fan size and performance selected from pages six through nine. A detailed explanation of the model number is shown to the right.

Performance certified is for Model AE exhaust for installation type A: Free inlet, Free outlet. Performance ratings include the effects of a birdscreen. The sound ratings shown are loudness values in fan sones at a distance of 1.5 m (5 ft) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for Installation Type A: free inlet hemispherical sone levels.

Performance certified is for Model AS supply for installation type A: Free inlet, Free outlet. Performance ratings include the effects of a birdscreen. The sound ratings shown are loudness values in fan sones at a distance of 1.5 m (5 ft) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for Installation Type A: free outlet hemispherical sone levels.

Specifications

Direct drive axial roof exhaust or supply fans

The fan propeller shall be constructed of aluminum with a swept, steeply pitched blade. A standard setscrew shall lock the propeller to the motor shaft. Propellers shall be statically and dynamically balanced. The fan housing shall be constructed of heavy-gauge aluminum with a rigid internal support structure and a birdscreen.

Motors shall be permanently lubricated, heavy-duty type, carefully matched to the fan load and furnished at the specified RPM, voltage, phase, and enclosure. Motors shall be readily accessible for maintenance.

A disconnect switch shall be included from the factory and wiring shall be run from the fan motor to a junction box within the motor compartment. A conduit chase shall be provided through the curb cap to the motor compartment for ease of electrical wiring.

All fans shall bear the AMCA Certified Ratings Seals for Sound and Air Performance.

Each fan shall bear a permanently affixed manufacturer's engraved metal nameplate containing the model number and individual serial number for future identification.

Fans shall be model AS and AE as manufactured by Greenheck Fan Corporation, Schofield, Wisconsin.

Enjoy Greenheck's extraordinary service, before, during and after the sale.

QUICK

Greenheck offers added value to our wide selection of top performing, energy-efficient products by providing several unique Greenheck service programs.

 Our Quick Delivery Program ensures shipment of our in-stock products within 24 hours of placing your order. Our Quick Build made-to-order products can be produced in 1-3-5-10-15 or 25-day production cycles, depending upon their complexity.

 Greenheck's free Computer Aided Product Selection program (CAPS), rated by many as the best in the industry, helps you conveniently and efficiently select the right products for the challenge at hand.

- Greenheck has been Green for a long time! Our energy-saving products and ongoing corporate commitment to sustainability can help you qualify for LEED credits.
- Our 3D service allows you to download, at no charge, easy-to-use AutoDesk™ Revit™ 3D drawings for many of our ventilation products.

Building Value in Air

Greenheck delivers value to mechanical engineers by helping them solve virtually any air quality challenges their clients face with a comprehensive selection of top quality, innovative airrelated equipment. We offer extra value to contractors by providing easy-to-install, competitively priced, reliable products that arrive on time. And building owners and occupants value the energy efficiency, low maintenance and quiet dependable operation they experience long after the construction project ends.

Our Commitment

As a result of our commitment to continuous improvement, Greenheck reserves the right to change specifications without notice.

Specific Greenheck product warranties are located on greenheck.com within the product area tabs and in the Library under Warranties.

Prepared to Support Green Building Efforts
