

Application

Model SMD-401EF is a class I leakage rated smoke damper with extruded aluminum blades and frame. High strength, streamlined extruded airfoil blades ensure the lowest resistance to airflow in HVAC systems. This model may be installed vertically (with blades running horizontal) or horizontally, and is rated for airflow and leakage in either direction.

Space Envelopes

Externally mounted actuators always require space outside of the damper sideplate or sleeve.

On dampers less than 18 in. (457mm) high, actuators may also require clearances above and/or below the damper. “B” and “T” dimensions are **worst case clearance requirements for some dampers less than 18 in. (457mm) high**. All dampers 18 in. (457mm) or more in height, do not require these worst case clearances. If space availability above or below the damper sleeve is limited, each damper size should be individually evaluated.

Actuator Type/Model	B	T
	Inches (mm)	
FSAF, FSAFB, and FSNF Series, Belimo	1½ in (38mm)	9¼ in (32mm)
FSLF Series, Belimo	8 in (203mm)	1½ in (32mm)

Multiple Section Dampers

Dampers larger than the maximum single section size, will be made up of a multiple equal size sections. Multiple section dampers can be jackshafted together so that all the sections operate together as shown below.

2 sections wide

**4 sections wide
2 sections high**
