 DATE: October 12, 2018
 SUBJECT: New Catalog for Model MAC

Greenheck’s MAC fan is a great way to achieve comfort cooling in many applications. Model MAC is designed to move high volumes of directed airflow at low velocities in commercial and industrial applications.

Typical Applications Include:

- Manufacturing Facilities
- Warehouses
- Loading Docks
- Automotive Shops
- Agricultural Facilities
- Educational Facilities

For more detailed information on model MAC, [click here](#) to view the new product catalog. You will find our three-step selection guide on page 3 to help you choose the right fan for your application.

Standard Features:

- Sizes 18 to 48 inches
- Belt and direct drive configurations
- Performance capabilities range from 2,400 to 21,000 cfm
- Multiple mounting options

Beginning in CAPS® 4.27, all direct drive MAC fans are available on our QD program.
