SUBJECT: New Model MAC Catalog

Greenheck's mobile air circulator (MAC) is a great way to achieve comfort cooling in many applications. Model MAC is designed to circulate airflow and spot cool in commercial and industrial applications. Use our new product catalog with an easy three-step selection guide to help you choose the right fan for your application.

Typical Applications

- Manufacturing facilities
- Warehouses
- Loading docks
- Automotive shops
- Agricultural facilities
- Educational facilities

Standard Features

- Sizes 18 to 48 inches
- Belt and direct drive configurations
- Performance capabilities range from 2400 to 21000 cfm
- Multiple mounting options

Also keep in mind, all direct drive Model MAC fans are available in the Quick Delivery program and are ready to ship same day as ordered!

For additional copies of this catalog, please request through RepNet or download from Greenheck.com.
