

Bulletin: 04-19

TO: All Greenheck Representatives
FROM: Bryan Magnuson,
Application Engineer II, Ceiling Exhaust Fans
DATE: January 22, 2019
SUBJECT: Model SP-A-VG Energy Star Recognition

Energy Star Most Efficient

Bath fan models SP-A50-90-VG and SP-A90-130-VG have been designated as one of the **Most Efficient of ENERGY STAR® certified products in 2018**. Products that are recognized as Most Efficient minimize greenhouse gas emissions by meeting rigorous energy efficiency performance levels set by the U.S. Environmental Protection Agency.

These models offer:

- Automatic adjustment of installer selected CFM regardless of system static pressure
- Industry leading energy performance for low operating costs
- Low sound levels, helping ensure occupant use and maintaining acceptable indoor air quality (IAQ)

This recognition, along with ongoing product line improvements, solidifies our commitment to becoming the manufacturer of choice in multifamily residential construction, giving you more tools to significantly increase your sales of Greenheck bath fan business.
