SUBJECT: Sidewall Mounted CUE/CUBE Replacing Models CW/CWB

The August release of CAPS® 4.30 will provide several improvements for wall mounted CUE/CUBE models to help win on bid day.

- Adding a flush mounting flange option for non-UL762 applications
- Adding the interior wall grille option
- Removing the \$100 list price add for the sidewall mounting option

These improvements will complete our wall mount offering which began with the introduction of wall mount CUE and CUBE models in CAPS 4.21 (August 2016). The square base on these units offer simple mounting and additional accessories required by code in commercial cooking applications.

Model CUBE

With this last addition of improvements for the sidewall CUE/CUBE models in CAPS 4.30, you have a full range of sizes, performance, and accessories. The sidewall CUE/CUBE models now provide a superior selection to models CW and CWB.

As a result, models CW and CWB will be discontinued over a series of CAPS releases. Starting with CAPS 4.30 (August 2019), models CW and CWB will not be available for new selections. However, you may still order existing marks (selections) for projects already quoted until the December 2019 (CAPS 4.31) release when the models will no longer be available for order.

	Sidewall CUE/CUBE	CW/CWB
CFM	14,700	12,450
SP	5.0	2.75
Sizes	060 – 300 (incl. HP, XP)	060 – 300 (excl. HP, XP)
