

Bulletin: 28-19

TO: All Greenheck Representatives
FROM: Bethany Seubert
Product Manager, Dedicated Outdoor Air Systems
DATE: August 2019
SUBJECT: RV/RVE Catalog

Greenheck's dedicated outdoor air systems (DOAS) team has updated the RV/RVE product catalog to incorporate new features and our expanded product line.

The new RV/RVE catalog includes:

- Unit sizes RV-110 and RVE-180 - expanding capacities up to 18,000 cfm and 70 tons packaged cooling
- Inverter compressor option
- Updated controls platform with Web User Interface
- Horizontal duct connections
- Remote condenser - 5-30 tons cooling capacity
- Low sound condensing fans and radiated sound
- Selection availability in eCAPS® for outdoor air units

This updated catalog is a great tool to utilize with engineers and contractors to showcase the wide product breath of the Greenheck RV and RVE units and features that provide precise control, energy efficiency and flexibility.

For additional copies of this catalog, please complete the Literature/Catalog Order Form found on RepNet in Support Center>Marketing Tools section or download the catalog from Greenheck.com.
