

TO: All Greenheck Representatives
FROM: Ron Wendorski
Director, Bernard A. Greenheck Education Center
DATE: October 2, 2019
SUBJECT: 2020 HVAC University Schedule

Thank you to our Rep Partners for another successful year of Greenheck HVAC University for Engineers. We continue to receive many positive reviews from your engineers regarding the program.

In 2020, we will offer 15 sessions of HVAC University for Engineers. If you have not taken the opportunity to have your engineers attend one of these educational events, this is a great time to start discussing a 2020 visit. The topics covered include HVAC product application, energy efficiency, codes, standards and industry trends. Professional development hours (PDH) are issued for completed courses and engineers have the ability to earn ten PDH credits or more during the trip. Greenheck is an approved continuing education provider in all 50 states and Canada

2020 HVAC University Schedule

2020 HVAC University for Engineers
