

Bulletin: 54-19

TO: All Greenheck Representatives
FROM: Bryan Magnuson,
Senior Application Engineer, Ceiling Exhaust Fans
DATE: December 12, 2019
SUBJECT: SP-A-VG Approved for use with Ceiling Radiation Damper

The SP-A50-90-VG and SP-A90-130-VG are now approved for use with CRD-310WT and CRD-310L ceiling radiation dampers (for lighted configurations). This approval increases our extensive offering of third-party certifications and provides you with more opportunities to sell the SP-A-VG into multifamily buildings. This enhancement was a collaborative effort between our damper and ceiling business units, further demonstrating Greenheck's commitment to helping you win in multifamily construction.

Effective with CAPS® 4.31, you may select ceiling radiation dampers as loose or mounted on the SP-A50-90-VG and SP-A90-130-VG.

Contact the ceiling fan team with questions via email ceilingfans@greenheck.com or phone 800-984-8713, option 1.
