

Bulletin: 23-20

TO: All Greenheck Representatives
FROM: Matt Gaedtke
Segment Manager, Laboratory and Fume Exhaust Systems
DATE: April 13, 2020
SUBJECT: QEI Announcement

Greenheck is pleased to announce the new QEI Series 100 in CAPS 4.32 (April 2020). Like our USF blower products, the QEI family now has multiple series of construction allowing you to select the best configuration for a given application at the most competitive price. You will find that the new QEI-100 belt drive meets most of your low-pressure applications at a lower price point.

QEI Series 100, 200 and 300 Overview

Model	Former Model	Peak Pressure
QEI-100	NEW	Class 0 or up to 3 in. w.g. (.75 kPa)
QEI-200	QEI-I	Class I or 4.5 in. w.g. (1 kPa)
QEI-300	QEI-II	Class II or 8 in. w.g. (2 kPa)

Model QEI

Features of the Series 100

- Sizes 12 – 33 cover flows up to 26,000 cfm (44,200 cmh)
- Welded and painted housing allows for indoor or outdoor applications
- Welded aluminum impeller provides spark resistance (AMCA spark B)
- AMCA Air and Sound performance exceeds ASHRAE Fan Efficiency Index (FEI) requirements
- Universal mount options provide onsite configuration changes
- Standard punched flanges for easier duct connections

For more information on the new QEI Series 100, please contact us at vektor.support@greenheck.com or 1-877-835-8677.
