SUBJECT: New AMCA 550 Louvers

Louver models **ESD-635D** and **ESD-635DE** now possess the **AMCA 550 Listing** label when selected with the optional factory attached **VCD-40** damper. The damper must be in the closed position to comply. Closed AMCA 550 louvers are traditionally applied in areas that do not require ventilation during a significant tropical weather event.

We continue to expand our industry leading line of AMCA 550 Hurricane louvers to meet the building code requirements throughout the Hurricane-Prone Region, which includes the Gulf of Mexico coast, the entire US Atlantic seaboard, Hawaii, Puerto Rico, Guam, American Samoa and the Virgin Islands. The International Mechanical Code (2012/2015/2018) dictates that all intake and exhaust louvers must comply with AMCA 550 if located within the Hurricane-Prone Region.

Greenheck AMCA 550 Listed Louvers

Open Products	Closed Products
EVH-302	<i>ESD-635D/VCD-40</i>
EVH-302D	<i>ESD-635DE/VCD-40</i>

EHV-550D	
EHV-901	
EHV-901D	

Static submittals on greenheck.com will be updated to reflect the AMCA 550 Listing label soon and CAPS[®] 4.33 (August 2020) will be updated to include the AMCA 550 selection. At this time, we do not intend to update the ESD-635D or ESD-635DE Miami-Dade County Notice of Acceptance (NOA) documentation until the time of next expiration and renewal.

Please contact the louver department with any questions at 800-373-4866 or louvers@greenheck.com.
