SUBJECT: New Damper (CRD-320WT) Creates SP Fan Sales Opportunity

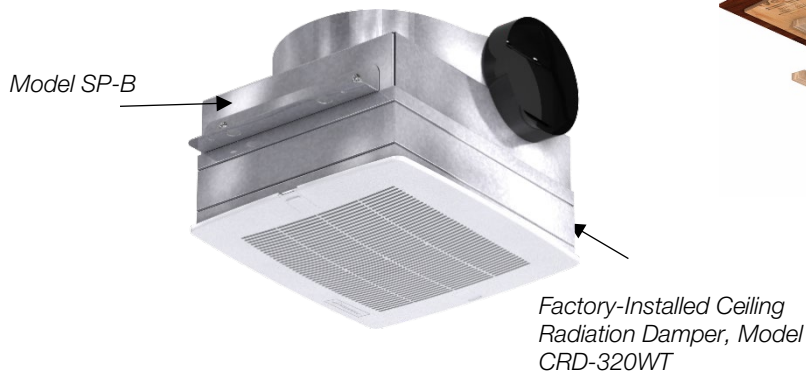

Greenheck is excited to introduce model CRD-320WT, a ceiling radiation damper (CRD) for wood truss applications. CRD-320WT is certified to UL-263/cUL-S101 installation (1-hour Combustible Floor/Ceiling Assemblies), and it represents new opportunities to sell SP series fans into multifamily buildings.

The release of CAPS® 4.33 allows you to select the CRD-320WT as an accessory to models SP-B50 through SP-B200, SP-L50 or SP-L80 and meet compliance requirements with UL. CRD-320WT can also be applied to the low-profile SP-L model when required in a ceiling installation. Greenheck's SP and CRD combinations have approval for use in 20 different UL design assemblies, making the combinations some of the most flexible in the market.

[Click here](#) for a flyer detailing bath fan options available with a CRD. A [webinar](#) providing more information on the application of these combinations also is available.

Please contact the ceiling fan team with questions via email [CeilingExhaustFans@greenheck.com](mailto:CeilingExhaustFans@greenheck.com) or phone 1-800-984-8713, option 1.

*This fan and damper unit is UL approved to be used in 20 different wood truss floor/ceiling and roof/ceiling assemblies*
