

Bulletin: 55-20

TO: All Greenheck Representatives
FROM: Jonathan Geissler,
Application Engineer, Ceiling Exhaust Fans
DATE: November 23, 2020
SUBJECT: New SP Grille Additional Details

Greenheck is excited to launch a new and improved grille for model SP fans. This change will be phased in with the CAPS® 4.34 release in December. The new standard grille offers improved aesthetics and maintains our industry leading air and sound performance. This grille is for model SP-A fans under 400 cfm, all model SP-B, and SP-L fans.

Important Implementation Steps:

1. Submittals and literature will show the new grille starting in December.
2. Production of the new grille will begin in mid-January.
3. Orders may receive the old designer grille, the new standard grille, or a combination of both from mid-January to early February.
 - a. A notice in CAPS will remind you of the change when selecting an **SP fan**.

Advanced inputs (optional)

Whole House Vent. (2 spd)	<input type="button" value="No"/>	Energy Star Rated	<input type="button" value="No"/>
Speed Controller	<input type="button" value="No"/>	Relaxed Constraints	<input type="button" value="No"/>

 Any fans ordered with grille type 'Des/Standard' or lighted may have a mixture of old and new style grilles. Contact ceilingexhaustfans@greenheck.com if the order requires a specific style. Specifying a grille style will increase the posted lead time 2-3 weeks.

4. If one specific grille type is required for the job, a special design request (SDR) will be requested. Any SDR will result in an extended lead time.
5. All orders will have the new standard grille by early February.
6. The designer grille will still be selectable on the stock tree in CAPS and Greenheck Parts.

Please contact the ceiling fan team with questions via email CeilingExhaustFans@greenheck.com or phone 1-800-984-8713, option 1.
