

TO: Greenheck International Representatives
FROM: Akash Agarwal, Managing Director - Asia
DATE: March 3, 2020
SUBJECT: Factory Expansion

Greenheck India Private Limited broke ground for an expansion of the manufacturing facilities in Bawal, Haryana, India. Members of the Greenheck executive team including Greenheck, President of Operations, Dave Kallstrom, participated in a groundbreaking ceremony on February 26, 2020.

The 40,000 square foot expansion increases needed capacity to provide you with the products your customers want, while ensuring lead time remains at high levels. It also allows us to grow the CDB and RA fan series, expand the damper line and add new products.

“The expansion will allow us to welcome more opportunities and is expected to begin in the near future to accommodate increased sales of HVAC products,” Kallstrom said. “As our customer base continues to grow, it is critical that we grow our operations here in India and beyond to support those customers.”
