SUBJECT: New High Volume, Low Speed (HVLS) Fan Offering – Model DS-M

Greenheck India is pleased to introduce model DS-M, the industry's first AMCA certified direct drive high volume, low speed (HVLS) ceiling fan. Model DS-M is the ideal selection for providing year-round comfort in air circulation and thermal destratification applications.

Model DS-M features an aerodynamic, extruded aluminum airfoil blade with sizes up to 24-feet in diameter. This design delivers maximum airflow at a fraction of the operating cost of traditional HVLS fans. The fan's universal ceiling mount and plug-and-play design make it the market's easiest HVLS fan to install.

Designed with safety in mind, each DS-M fan includes heavy-duty, redundant safety systems on all critical components. The DS-M fan also is factory tested and includes a standard 10-year warranty.

Three sizes are available with AMCA licensed air performance up to 300,555 cmh (176,900 cfm).

Sizes: 16, 20 and 24 feet

Performance: Up to 300,555 cmh (176,900 cfm)

Standard Features:

- High-efficiency, direct drive motor
- Factory-mounted and wired VFD
- CFD-optimized airfoil design
- Redundant safety systems
- 3.5-ft. downtube with universal ceiling mount
- 3-ft. factory-wired power cable
- Standard touchscreen control
- 50-ft. of CAT-5e control cable
- 10-year warranty
