

Bulletin: 23-21

TO: All Greenheck Representatives
FROM: Derek Hawley
Segment Manager, Axial
DATE: June 1, 2021
SUBJECT: Axial AER-VG Sound Update

Important sound data updates were made on model AER with Vari-Green® motors selected in the CAPS® 4.35 update. Previously, depending on the pitch of the propeller, the sound performance was not showing the correct information and potentially showing negative sound values. When you open your AER-VG marks in CAPS after this update, marks will automatically update your sound performance with the corrected values. Please review your existing Vari-Green selections for the model AER.

Please contact the Axial, Inline, & HVLS support team at 1-800-984-8713, or email aifans@greenheck.com for more information and support.
