

Sales & Marketing Bulletin

TO: All Greenheck Representatives
FROM: Jody Meadows, Product Manager, Centrifugal Fans
DATE: July 12, 2021
SUBJECT: Model LSF Obsolescence

We are committed to providing you with products you need to succeed in today's market. Doing so sometimes means removing slow moving outdated models allowing us to focus on the high demand products that you sell most. As a result, model LSF will no longer be selectable effective with the CAPS® 4.36 (August 2021) release. You can still order existing selections until the release of CAPS 4.37 (Dec. 2021).

Greenheck still offers a variety of un-tempered supply fan options. For future application needs, please [explore models SAF, RSF, RSFP, TCBRS](#) and [RBS](#).

Please submit outstanding submitted orders for model LSF before the December CAPS 4.37 release. Contact the CVI Marketing team at 1-888-284-3306 or e-mail to CVIMarketing@Greenheck.com with questions.
