

Bulletin: 24-22

TO: All Greenheck Representatives
FROM: Dave Mayer, Product Manager, Power Roof Ventilators
DATE: May 23, 2022
SUBJECT: USGF Miami-Dade NOA for High Wind Expiration

The Miami-Dade notice of acceptance (NOA) for high wind certification on model USGF is set to expire on July 12, 2022. Due to low demand, this certification will not be renewed. Starting in the August 2022 CAPS®, high wind will not be selectable.

The NOA must be active/valid when the building permits for the project are pulled. This means the product can be shipped/installed after the NOA expires.

Model CUE and CUBE will continue to hold the Miami-Dade NOA for high wind certification and could serve as an alternative when applications require high wind certification.
