

TO: All Greenheck Representatives
FROM: Mike Bump
Sr. Application Engineer, Inline Fans
DATE: May 15, 2023
SUBJECT: KSQ - New Product Release

Greenheck is excited to announce model KSQ is now available! Model KSQ is compact and ideal for filtered roof-mounted supply or untempered make-up air systems in clean air environments. It provides a unique combination of installation flexibility, ease of service, high efficiency, and low sound levels. Washable aluminum filters are provided with the option to add pleated MERV 13 filters. These fans deliver competitive advantages in a wide range of applications.

Common applications include:

- Kitchen supply
- Stairwell/elevator shaft pressurization
- General filtered supply

Multiple configurations are available:

- Horizontal or bottom intake
- Horizontal or bottom discharge

Direct Drive with High-Efficiency Mixed Flow Wheels

- 12 sizes, 7 through 33
- Performance up to 16,750 cfm and 2.75 in. wg

Vari-Green® option on all sizes, up to 10 hp available

Model KSQ replaces models SAF, KSFB, KSFD, and MSF

- Replaced models targeted for obsolescence within a year
- We encourage updating specifications referencing these legacy models to the KSQ

For more information on our KSQ Mixed Flow offering please visit our [website](#) or check out our one-page [sales flier](#). As always, do not hesitate to contact the Inline team at aifans@greenheck.com.
