SUBJECT: Important Update: Centrifugal Double Inlet Double Width Blower (Model CDB)

Dear Reps,

Previously Centrifugal Double Inlet Double Width fans (Model CDB), in sizes ranging from 500 mm to 710 mm diameter, were offered with aluminum wheel construction. Our engineering team has recently implemented some design changes as part of an overall product enhancement.

Effective immediately, wheels will now be offered with steel construction for sizes 500 mm to 710 mm.

Please note that there shall be no change in the performance of the CDB fans as the performance will remain consistent with the previous aluminum wheel version.

Thank you for your understanding and continued support.

Happy Selling!

Thanks,
Mukul Sharma
