

# BULLETIN

JUNE 17, 2024

TO: US Greenheck Representatives  
 FROM: Ed Merewether, Segment Product Manager,  
 Grilles, Registers, and Diffusers  
 SUBJECT: Concealed Mounted Plenum Width Changes

To simplify our plenum offering we will be changing the widths on all our concealed mount or hemmed plenums. In the future, all concealed mounted plenum widths will be built on 1/2" increments. Our goal is to make the selection process easier for our customers, and the installation process easier for the contracting community.

Please note that straight/non-hemmed plenum dimensions remain the same. Also, in some cases, the widths of the plenums have increased or decreased (see examples below).

Examples:

XG-AFLC Dimensions				
Models	Slot Width	# of Slots	Old Width	New Width
XG-UPI-AFLC-10	1	1	3 -3/4	4
XG-UPI-AFLC-10	1	2	6 -11/16	7

XG-6600 Plenum Dimensions				
Model	Slot Width	# of Slots	Old Width	New Width
XG-UPI-6650	1/2"	1	2 -5/16	2
XG-UPI-6650	1/2"	2	3 -9/16	3 -1/2
XG-UPI-6650	1/2"	3	4 -13/16	4 -1/2
XG-UPI-6650	1/2"	4	6 -1/16	6

*XG-AFLC Plenums: The widths have increased between 1/16" up to 5/16"*

*XG-6600 Plenums: The widths have decreased between 1/16" up to 5/16"*

This change will be effective as of **August 1, 2024**, and will go into production starting on the effective date. After the new design begins to ship, the old submittals will be discontinued, and the newest submittals will be online with the revised dimensions.
