

Delivery Schedule

Greenheck Delivery Schedule

Greenheck recommends all representatives use the most current lead-time bulletin as an estimated factory lead-time guide. Lead-time bulletins are available in REPNET and are subject to change without notice. Lead-times are limited to actual working weeks (no holidays, Saturdays or Sundays).

Due to some limited stock on motors; motor vendor lead-times on special build motors; and 50 cycle requirements, Greenheck may be subjected to delivery based on motor vendor delivery to the factory.

Items which may affect order lead-time:

- Projects requiring additional engineering time (noted in Lead-Time Bulletin)
- Large projects
- Vendor delivery
- An order containing new product
- Special design requirements (SDR)
- Information needed from Rep/customer that affect the order from being processed
- Special coating or paint options.

In cases where delivery time is critical, contact your customer service representative.
