

## Hinge Latch Available in CAPS®

The hinged curb latch is an option now available in CAPS. This simple, field installed latch kit, provides a mechanism to ensure a hinged fan remains closed for both sidewall and roof mounted applications.

A hinge latch is an option available on models CUE/CUBE/G/GB sizes 60-200 when a hinged curb cap is selected.

A hinge latch is **standard** on sidewall fans sized 180 and larger when selected with a hinged curb cap.
