

#### **DESCRIPTION:**

The **ASSURE120** Energy Recovery Ventilator (ERV) is the perfect compact balanced ventilation solution for single or multifamily installations with limited mechanical space. The low-profile design simplifies installations in bulkheads and drop ceilings.

The Total Recovery Core transfers heat and moisture between two cross-flow airstreams without allowing cross contamination. When used for balanced mechanical ventilation in humid environments, the unit helps to reduce air conditioning (AC) energy costs. In colder climates, moisture transfer is reversed. The unit helps to moderate humidity and the core is a highly efficient heat exchanger.

## **SELLING FEATURES:**

**Improved Indoor Air Quality:** Continuously exchanges stale indoor air with fresh outdoor air, reducing pollutants, allergens, and odors.

**Energy Efficiency:** Recovers up to 69% of the energy from the exhaust air, reducing heating and cooling costs.

**Humidity Control:** Balances indoor humidity levels, preventing excess moisture and the growth of mold and mildew.

**Low-Profile:** 9.75 inch height. Designed for height restricted installations.

**Easy Maintenance:** Washable antimicrobial MERV-6 air filters in exhaust and supply airstreams, a convenient hinged door without screws, and a removable motor and electronic assembly allow for easy maintenance and service.

### Performance

■ 50-130 cfm

# Standard Construction and Options

- Two Conventional Motors
- Exhaust & Supply Side Ports
- Ceiling Mount Only
- Recirculating Defrost Mode

### **Configuration Options**

- Mirrored Airflow Configuration
- Hardwired Electrical Connection

### **Common Applications**

- Multifamily spaces up to 1500 sq. ft.
- When value engineering (VE) or most cost-efficient product is required

### **Key Accessories**

- Optional MERV 13 Filters (485465)
- 20/40/60 Timer (435247)
- Dual Hood (435250)
