

Delivering the Total Package

Greenheck provides complete ventilation systems for distribution centers.

■ SINGLE SOURCE

■ EASY SELECTION

■ ENERGY EFFICIENT

Greenheck is the single source that delivers all of the air movement, conditioning and control equipment needed for warehouse and distribution center ventilation systems.

We make it easy to specify integrated systems that:

■ Help protect inventory and packaging integrity

■ Maximize energy efficiency

■ Reduce initial equipment and installation costs

■ Create a safe and productive environment for employees

1 Centrifugal Exhaust Fan

2 Make-up Air Unit

3 High Volume Low Speed Fan

4 Upblast Exhaust Fan

5 Hooded Rooftop Propeller Fan

6 Hazardous Fume Exhaust Fan

7 Damper

8 Sidewall Propeller Fan

9 Dock Fan

10 Operable Intake Louver

11 Portable Mancooler Fan

12 Dedicated Outdoor Air System (DOAS)

Greenheck makes distribution center ventilation easy.

Let Greenheck help you with the logistics on your next ventilation project with our full line of products.

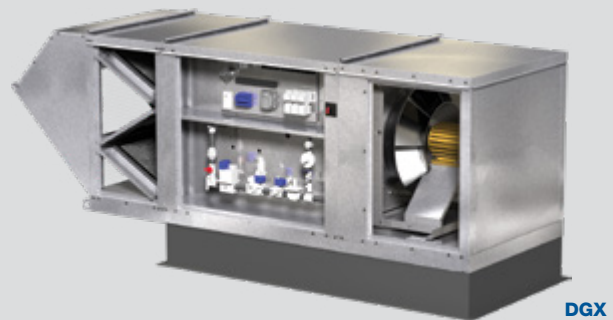

SUMMER VENTILATION

Greenheck's extensive fan, louver and damper product lines offer an efficient, cost effective solution for ventilating any warehouse or distribution center. Intake louvers with high intake volume capacity minimize installation costs and high efficiency fan and motor options reduce operating costs.

SPACE HEATING

Direct gas-fired make-up air units provide cost effective, highly efficient heating by utilizing 100% outside air and 80/20 recirculating configurations. Model DGX is available with a direct drive mixed flow fan that can reduce operating power by as much as 50% at a similar first cost.

AIR CIRCULATION

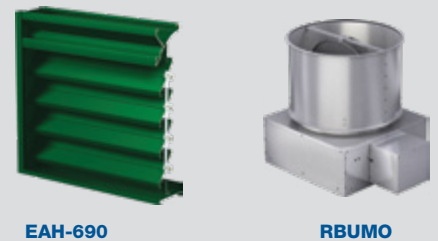

Models DS-3 and DS-6 high volume low speed (HVLS) fans are ideal for destratification, comfort cooling and condensation prevention in large industrial spaces.

- AMCA Certified performance up to 243,000 cfm.
- Plug-and-play design reduces installation time by up to 50%.
- Mobile air circulators and dock fans are also available.

SMOKE EXHAUST

Mechanical smoke removal systems aid emergency personnel in event of a fire. Greenheck offers a wide variety of high-temperature exhaust fans with UL Power Ventilator for Smoke Control listings, and various louver and dampers models, to meet smoke exhaust application requirements.

eCAPS®, our online product selection program, makes specification easy.
